CAPITALIST TALKS SHOP

Favorable Opinion on Hawaiian Values.

GOOD PROSPECT FOR LOANS

John A. Buck Thinks Visiting Financiers are Satisfied With Impressions.

An interview was obtained by the Advertiser yesterday afternoon at the Hawaiian hotel with Mr. John A. Buck of San Francisco, who came to the Islands with a party of capitalists representing the Germania Bank and Loan Association, to look into values and investments probable and possible in Hawaii. Mr. Buck was found practically confined to his room on account of a sprained ankle gained from the accident to the Hilo stage in which he and Mr. Irwin had a narrow escape some days ago. The sprain compelled Mr. Buck to use crutches, which he has now discarded and packed up ready to send to his friends in Hilo who may still be in need of them. The accident has not prevented Mr. Buck from making a thorough tour of this Island after having paid a visit to every sugar plantation of importance on the Big Island.

"While I came down here with the folks from the Germania Association," said Mr. Buck, tenderly nursing his bandaged foot, "I came here for my own individual interests. The party are all friends of mine and we did our visiting together, but primarily I was looking after my own affairs. I am widely interested in sugar matters here and have been for many years. I am practically a kamaaina, although my home is in San Francisco and has been for the last forty years. Still I visit Hawaii every year or so. I was here last two years ago, and needless to say am surprised at the rapid strides made by Honolulu in that period.

"We found every appearance of prosperity in all the plantations visited on the Big Island, the cane in every case making a fine showing. I was perhaps the better qualified to judge on that point, having been manager of the Hutchinson plantation in 1880. I am still president of the concern besides being president of the Honolulu Sugar Co. and vice president of Hakalau. I also possess interests in Paauhau. I feel sure that the representatives of the German bank are returning fully satisfied of the value and solidity of most of the plantations handled and submitted by them. Loans, I am confident, will be easier to obtain on real estate and other securities after this visit, which will prove in many ways beneficial to the community. Much interest was shown in the various plantations and in the Hilo railroad."

Mr. Buck is interested in the Matson Navigation Company, but when questioned on the likelihood of direct transit between Hilo and the Coast, disclaimed any knowledge of the doings of the company in that direction.

"There are some members of the party," the capitalist went on to say, "who think that Hawaiian real estate, particularly in Honolulu, is under the influence of a boom. It is probable that their views have been altered by their present visit. The association is already largely interested here and has the command of several millions which, should they think favorably, is open for investment here. I should judge that the present trip may advance Island securities."

"It is hard for many people on the Mainland to realize the difference between a California ranch and the enormous expenditure and enterprise needed in connection with a sugar plantation. To them the large amount of capitalization required seems an attempt to create artificial values and the impressions of capable men who have visited the Islands will do much to counteract these ideas."

"I think that present values are solid and will remain so for many years to come. I do not see any indications of a boom. While sugar, which is of course the backbone of the Territory, will undoubtedly deteriorate in price after a while, improved machinery and the consequent decrease of labor should keep the dividends up to the mark. The machinery in general use in the Islands is now ahead of that used anywhere else."

"With regard to the labor question, I am inclined to judge that the Porto Ricans, properly acclimated and handled, are the best solution. Their children should make excellent field laborers. I have not observed the negro element at all closely. In the '80s the negroes employed were the riff-raff, runaway sailors and others that happened along. There is plenty of land yet available for sugar, while over here near Honolulu is produced the biggest yield to the acre in the world. The Hawaiian Islands are an excellent field for investment in my mind. I have been interested here for many years and am still satisfied to keep my financial eggs in the Hawaiian basket. The impressions of the returning party will, I think, coincide with mine."

Mr. Buck and the other members of the party will return on the Mariposa in two weeks' time, after an exhaustive inquiry and survey of the interests that have been brought before their notice. While Mr. Buck disclaims any actual connection with the visiting financiers, he is regarded as an expert on many Hawaiian values and was invited to accompany the visitors and express his opinions of securities with which he was unfamiliar.

Pronounced Al-gah-roba.

Editor Advertiser: Will you kindly allow me to correct your spelling and probably your pronunciation of the name of

a common and very useful tree, namely the algaroba, which should not be called algaroba, as it is so often. For this I have the authority of a good botanist and also the fact that it is a near relative of the "carot" tree, Arabic, "al karob," which bears the historic "husks" that the swine did eat." The letter "g" of course in this case is hard. In the interest of accurate language, April 1, 1901. L.

CLEANLY WOMAN.

Erroneously Thinks By Scouring Her Scalp That She Cures Dandruff.

Cleanly woman has an erroneous idea hat by scouring the scalp, which removes the dandruff scales, she is curing the dandruff. She may wash her scalp every day, and yet have dandruff her life long, accompanied by falling hair, too. The only way in the world to cure dandruff is to kill the dandruff germ, and there is no hair preparation that will do that but Newbro's Herpicide. Herpicide killing the dandruff germ leaves the hair to grow as healthy Nature intended. Destroy the cause, you remove the effect. Kill the dandruff germ with Herpicide.

SPORTING NEWS OF HONOLULU

Interesting Figures of the Local Records—Myrtles Will Smoke and Sing.

The three-team polo tourney of the Oahu Polo Club will occur on the 13th inst. instead of on the 7th, as previously announced. The purpose of the tournament is to decide the team which will play against Maui on the 20th inst.

The Myrtle Boat Club will give a smoking concert two weeks from next Saturday. A feature of the affair will be the auctioning off of the privilege of naming the club's two new boats, one of which is a six-oared gig recently purchased from the Government, while the other is the pair-oar shell which has just arrived from Germany. Harry Armitage has kindly consented to act as auctioneer. The bidding will be open to club members. No precedent exists in the club for the naming of boats, and the auctioning scheme seems to be an excellent solution of the difficulty.

W. W. Harris, A. A. Wilder and A. F. Judd are the Myrtle "smoker" committee.

The Myrtle Club will start preliminary rowing work immediately after Easter.

Swimming and driving continue to be star attractions at the Healan boat house and the new trapeze and high dive developing several very good performers. Preliminary boat work will not be started upon by the club until the beginning of May.

Dr. Posey has taken his filly, Ahui Manu, to New York. The horse has been re-named Quicksilver.

On Thursday next the Icarus footballers will play against the English team and are expected to prove victorious. The game will give the visitors some much needed practice for their game against the League on Saturday, which should prove a first-class encounter.

Kaulukou of Punahou said yesterday that he finished second in the 220-yard dash last Saturday. Many spectators are of the same opinion. The judges placed Akana second and Kaulukou third.

It is rumored around town that a local athletic association will shortly be formed, which will affiliate with the Amateur Athletic Association of America. If this is done a board of governors will be elected, to whom appeals or protests against the official decisions must be taken. A referee will also be provided, whose powers are higher than the judge's and whose decision shall be final and subject only to the action of the board of governors.

The three-mile race of the Malle Hima Athletic Club, from the Moana Hotel to the Opera House, has been changed to a relay race. Two teams at least will compete and the distance will be divided into thirds.

The Hawaiian record for 100 yards is 10.6, and was made by J. L. Torbert on March 17, 1891. The timekeepers were reliable and two of them caught the time at 10.2-5, while the third man stopped his watch at 10.3-5. The difference was split, and the record stands today.

J. L. Torbert also holds the Island record for an hour's run, having covered 10.1-3 miles in that time on October 10, 1888. The track was twenty-three laps to the mile, which makes Mr. Torbert's performance the more remarkable.

The mile record is 5 minutes 12 seconds, made in 1884 by Gannon, who beat Sims in a race for \$1,000 a side. The loser sold out to Gannon and walked in. This record has not been beaten, and stands today. Some of the men running at present should go in 4:50 or better.

Koa furniture and a black walnut bookcase, also some choice ferns and palms will be sold today at Morgan's salesrooms. The palms are from the Moanalua garden.
